

DISCOVER NEW DIMENSIONS OF GAMING

OUTER RING

A DEEP SPACE MMO

WEB |

CATEGORY | A DEEP SPACE MMO

ABOUT THE GAME

Outer Ring MMO is a free-to-play 3rd person sci-fi action RPG spanning an entire universe. You will enter a unique metaverse and embark on an epic journey across galaxies to discover new worlds, unravel ancient mysteries, and face the dangers of deep space. Captain your trusty spaceship and become a legend of the stars!

Inside the game, you will be responsible for the creation of all in-game assets, from swords, armor, and firearms, to vehicles, ships, lands, and buildings. To do so, you will need to discover, collect, refine, and trade resources that fuel the fully Player-Driven Economy. Also, you will be able to transform items into Non-Fungible-Tokens (NFTs), allowing you to claim ownership of these digital assets and earn value for time invested in the game.

JOIN THE ARMY

GAMEPLAY

In Outer Ring MMO, you have the freedom to choose your preferred roles and style of play. You can engage in PvE and PvP combat, including frenetic arena fighting, challenging dungeons, and titanic spaceship battles. You may choose to focus on harvesting resources, crafting items, and building structures to help shape the game world. Or seamlessly switch between roles as you wish.

However you approach the game, the core loop of Outer Ring remains constant, with you acquiring new abilities and equipment to overcome formidable challenges, reach new frontiers, and forge your own narrative across the universe.

Outer Ring MMO departs from the restrictions of character classes and instead features a highly flexible 'use-based' skill system. As you shoot, fly, harvest, craft, and explore, you will improve these skills organically, while selecting specific talents and perks to refine your playstyle. You may choose to become an expert marksman, mineral miner, or weaponsmith, or pursue a broad range of skills to handle any situation.

To find the rarest and most valuable resources and minerals, you will have to risk everything to face the dangers of the uncharted universe. Hidden planets, exotic materials, and ancient alien artefacts are waiting to be discovered by you. Be brave enough to make the journey and discover the mysteries of the Outer Ring.

METaverse AND BLOCKCHAIN

Outer Ring offers you an immersive Metaverse experience set in a vibrant and unique galaxy, starting in the hub area of Great Silver City. You can buy and sell NFTs in the bustling commercial district, acquire exclusive Lands, participate in the Governance System, and join partner events to obtain exciting and special rewards.

The implementation of blockchain technology within the game enables you to convert the valuable commodities you craft into actual income by using the game's native cryptocurrency: Galactic Quadrant. Through this system, you can trade the time and effort invested in your adventures for tangible rewards.

RACERLOOP

WEB |

CATEGORY | Arcade Racing

BE THE FASTEST

Racerloop is a zero-gravity arcade racing game based on the Outer Ring universe where you take on a new challenge, to be the fastest in the universe. In this thrilling and fast-paced gaming experience, you will race in multiple and unique circuits, located on different planets with unique environments and features.

TOKENIZED FREE MARKET

In Racerloop, you will be able to customize and upgrade your ships, trading and exchanging parts and vehicles in a blockchain-based economy and marketplace.

ONE LAST BREATH

WEB | CATEGORY | Atmospheric Adventure

ABOUT ONE LAST BREATH

One Last Breath is a 2.5D atmospheric adventure and puzzle game in which you will incarnate Gaia, the last will of nature, and as such you'll have to face a bleak world making use of the last remnants of life left in order to decide the face of all existence and escape from lethal creatures.
